## THEMATIC WORKSHOP

### Information Technology and Elections Management Informed Decisions for Sustainable Outcomes

# “Voter Registration and Methodologies in Africa: A Comparative Analysis”

Robert Gerenge  
Programme Officer, Elections and Political  
Processes, EISA

European Commission  
Development and Cooperation DG  
EuropeAid

United Nations  
Development Programme

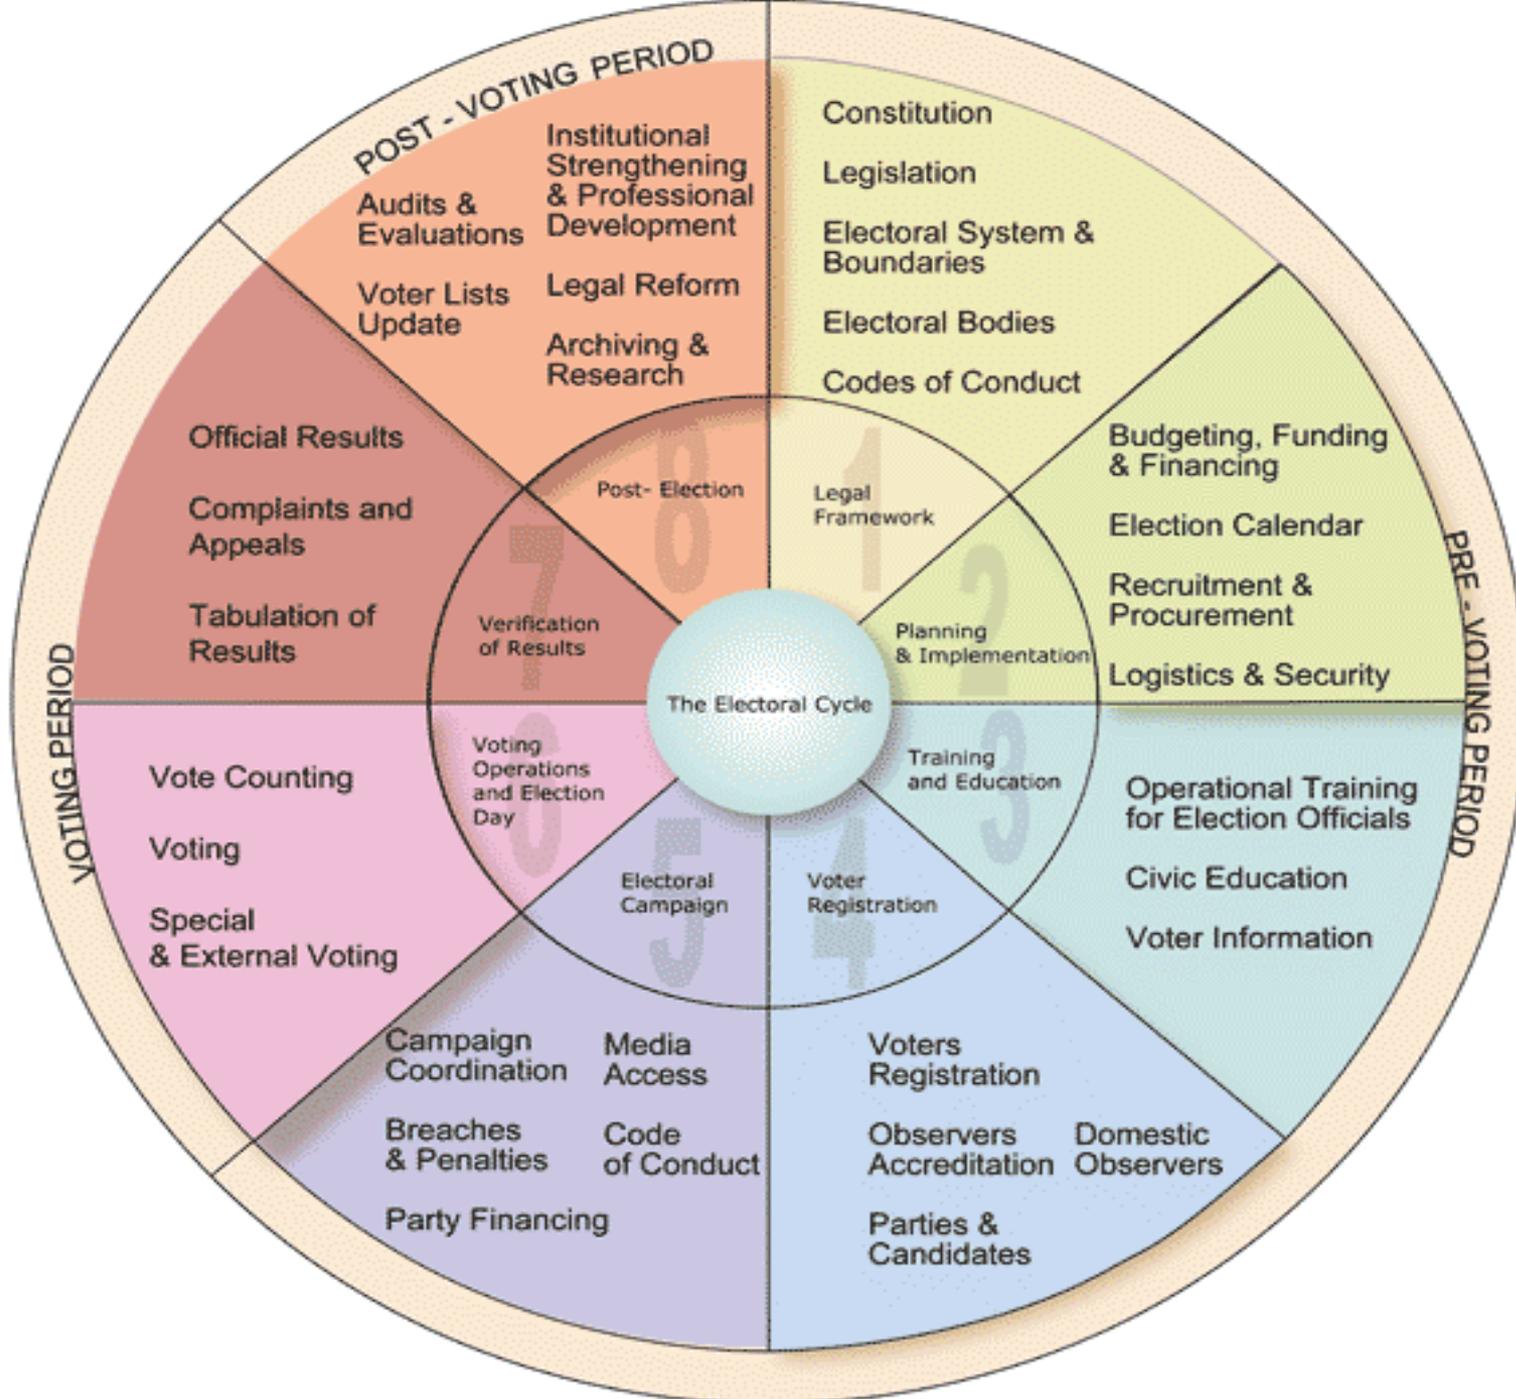

5 - 9 March 2012, Mombasa, Kenya

# Presentation Outline

---

- Voter Registration in the Electoral Cycle
- EISA Publication
- Guiding Principles of Voter Registration
- Overview of Voter Registration Methodologies in Africa
- Key Research Findings
- Conclusion

# EISA Publication on “Voter Registration Methodologies in Africa”

- **Objectives**

To promote awareness

To enable informed decision-making

- **8 Cases studies :**

- Democratic Republic of Congo, Ghana, Liberia, Malawi, Mozambique, Rwanda, Senegal, South Africa

# Guiding Principles of Voter Registration

---

- LEGALITY
- INTEGRITY
- COMPREHENSIVENESS
- INCLUSIVENESS
- FAIRNESS
- ACCURACY
- ACCESSIBILITY
- TRANSPARENCY
- TIMELINESS
- COST-EFFECTIVENESS
- CREDIBILITY
- SUSTAINABILITY

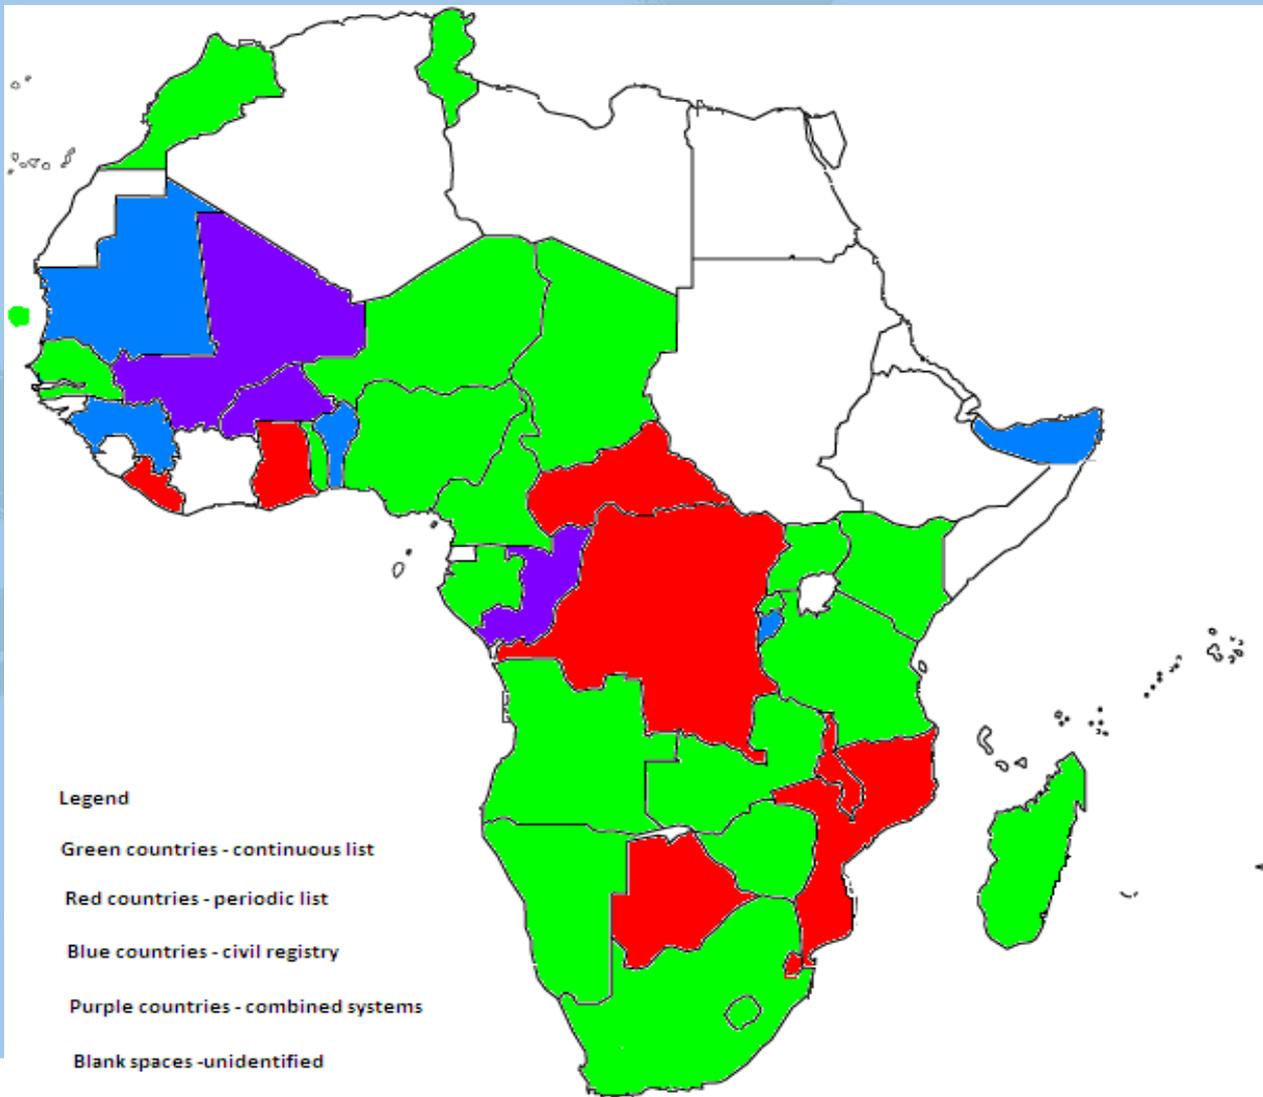

# Classification of Voter Registration Methodologies

- Voter registration systems may be classified based on a number of criteria:
  - a) Compulsory versus Voluntary Registration
  - b) Active versus Passive Registration
  - c) Continuous versus Periodic registration
  - d) Civil Registration versus Voter Registration

# CONTINUOUS or PERIODIC?

# VR Methodologies

# Medium Tech (cont'd)

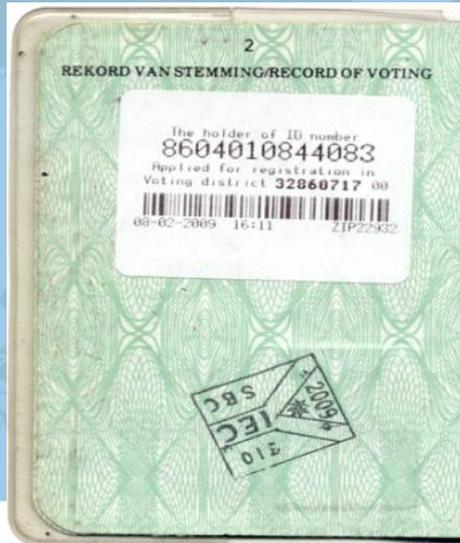

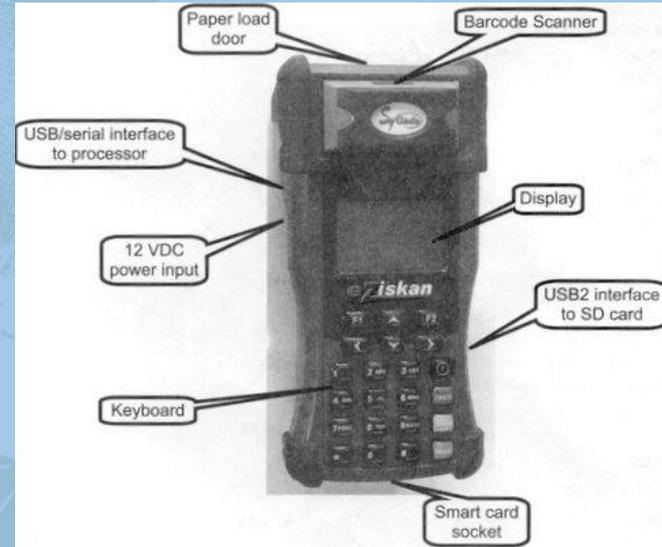

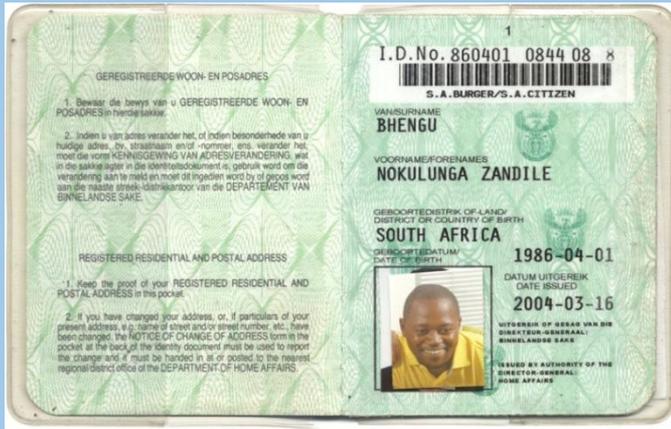

# VR Methodologies

## 3. Hi

# 3. High-tech systems (cont'd)

# Key findings!

---

- **Confidence in the EMB by election stakeholders is CRUCIAL!**
- **The use of high tech VR systems or methodologies does not necessarily guarantee credibility of the process**
- **Even best designed systems can fail if not well managed**
- **Institutional sustainability is crucial for sustainable VRM.**
- **VRM sustainability also depends on costs, storage/maintenance of equipment, human resource etc...**
- **Once a high-tech VRM has been adopted, it is difficult to revert to a less costly one.**
- **Lead Time – Election Calendar!**
- **VRM dependent on civil registers require relevant Government's Departments' effectiveness.**

# Conclusion

---

- **A sound voter registration process is crucial to a successful election.**
- **There is no one 'size-fits all' VRM**
- **Elections, at the end of the day, are a political process.**
- **'Technically perfect' elections, even if they were possible, will not necessarily deliver the political acceptance of election results by all stakeholders.**

---
